## Education

### **Bachelor of Applied Science - Engineering**

University of British Columbia, Vancouver, BC

Relevant Coursework: Introduction to Computation in Engineering Design (99%)

Expected Graduation: May 2028

## Technical Projects

### **Manhunt Game Management System**

*Co-Founder – Tech Lead*

- Led the development of an application that manages the moderation of manhunt games using real-time location of players, the ability to add changing game borders, and an automated tag tracking system.
- Wrote the frontend system using Next.js, taking advantage of the new App Router and Server Actions.
- Created a custom backend WebSocket server to handle live location data coming from player's phones, updating the Supabase database, and transmitting the live data to the admin dashboard
- Currently working on transitioning the application from a monolithic web application to a microservice based native application using React Native

## Work Experience
