

Evan Anderson

(825) 994-7800 | e.e.anderson@shaw.ca | evan-anderson.ca

TECHNICAL SKILLS

Languages: Typescript, Java, C, Python, PostgreSQL

Frameworks/Libraries: Next.js, React, React Native, Node.js, Playwright, JUnit

Tools & Platforms: PostgreSQL, Supabase, WebSockets, AWS, Git

EDUCATION

University of British Columbia

Bachelor of Applied Science in Computer Engineering

Vancouver, BC

Aug. 2024 – May 2029

EXPERIENCE

Software Engineering Intern/Contractor

Wygo

Jan 2026 – Present

Toronto, ON

- Restructured payment pipeline to support coupons that apply on a per-ticket basis, allowing hosts to target individual tickets rather than applying flat order-wide discounts
- Integrated Google Maps Places API into the event creation form to add location autofill and an attendee-facing map preview, reducing errors in event info and improving the attendee experience
- Rebuilt the overview page from new design specs, implementing a new design system, writing PostgreSQL CTE functions for data requirements, and translating mockups into production UI
- Collaborated directly with founders in a fast-paced environment, contributing to sprint planning and product growth

Undergraduate Teaching Assistant

UBC Computer Science

Jan 2026 – Apr 2026

Vancouver, BC

- Delivered weekly lectures on C programming and embedded systems (Arduino) to 50+ students, reinforcing core concepts prior to weekly exams
- Moderated a student question forum, facilitating peer collaboration, providing clarification when needed
- Evaluated midterm and final exams, providing students with detailed feedback to support their learning

Business Support Summer Student

TAQA North

May 2025 – Aug 2025

Calgary, AB

- Worked on IT Projects such as Mineral File Scanning and Notice of Assignment File Cleanup, handling over 22,000 files to enhance company data integrity
- Collaborated with Office Services by distributing mail, performing inventory control, and office organization

PROJECTS

Huntr

Large Scale Manhunt Game System

Oct. 2024 - Present

- Built a real-time location based multiplayer game using Next.js, Supabase, and a custom WebSocket server
- Architected a server designed to receive constant concurrent location updates from a high volume of clients
- Currently polishing the product for production by developing a native app for players using React Native
- Organized and operated large manhunt events at UBC with up to 300 participants

VOLUNTEERING

Intramurals Assistant Director

UBC Recreation

Sep. 2025 – Present

Vancouver, BC

- Managed email communication with over 30 teams, ensuring consistent and timely information was delivered
- Supervised weekly league games, checking players in, and monitoring fields for participant safety
- Assisted the events sector, volunteering at a variety of UBC Recreation events such as Day of the Longboat

Orientation Leader

UBC Engineering

Sep. 2025

Vancouver, BC

- Welcomed a group of incoming first-year students to UBC, fostering a welcoming and inclusive environment
- Facilitated campus tours, events, and discussions to help students have a smooth transition into university life
